EDUCATION

Gujarat Technological University

Bachelor of Engineering in Electronics and Communication

Aug. 2018 – Aug. 2022

WORK EXPERIENCE

Front End Developer

Ivy Club

April 2021 – Present

- Designed and developed views/templates leveraging VueJS and laravel blade templates.
- Built a responsive and customizable portfolio in VueJS, generated dynamically using information provided by the user.
- Utilized VueJS to build components responsible for setting up and creating a Club to organize meetups and workshops.
- Developed Color Picker (picking color from an image) and a Quiz using JavaScript and VueJS for cosmetic enthusiasts to help them identify what shade suits them the best.
- Developed authentication pages, homepage, carousel, modals and several other features using HTML, CSS, JavaScript and VueJS for a news information client.
- Assisted Senior Developer in resolving frontend bugs and conflicts.

PROJECTS

Gravity | *ReactJS, Redux, ExpressJS, MongoDB, Mongoose, TailwindCSS*

[Frontend](#) || [Backend](#) || [In Progress](#)

- Developing a full stack application imitating the popular social media app - Reddit.
- Used Express as backend framework to develop authentication and CRUD functionality for the app.
- Implementing Frontend using React, Redux and tailwindcss while adhering to best development practices.

Battleship | *HTML5, CSS3, JavaScript, ReactJS, Jest*

[Source Code](#) || [Live Preview](#)

- Created the classic battleship game in ReactJS, where a player destroys all the opponent's ships to claim victory.
- Used Jest to write tests for functions utilized in game's logic.

Shopping Cart | *HTML5, CSS3, JavaScript, ReactJS*

[Source Code](#) || [Live Preview](#)

- Added routing functionalities to the website using React Router.
- Used useContext hook to share the state with all the child components.
- Implemented various features such as adding and removing products to and from the shopping cart.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3

Frameworks and Libraries: ReactJS, Redux, VueJS, NodeJS, ExpressJS, Jest

Databases and ORM/ODM: MongoDB, Mongoose

Developer Tools: Git, VS Code, Webpack, ESLint
