EDUCATION

Gujarat Technological University — CGPA - 8.83
Bachelor of Engineering in Electronics and Communication — *Aug. 2018 – May. 2022*

WORK EXPERIENCE

SDE 1 - Frontend

Hybr1d — *August 2022 - Present*

- Setup Jira Worflows for both Frontend and Backend project. Also, helped configuring github workflows for automated deployment to AWS.
- Deployed Frontend dev branch to AWS. Especially, leveraged AWS's S3, Route 53, and Cloudfront.
- Revamped and developed the entire teams and settings module from scratch; perfectly imitating figma wireframes and delivering these modules on time.
- Developed Reports module, book time away flows, employee offboarding flow and focused on fixing bugs for both existing and new flows.
- Revamped utilities controller on the backend (nodejs) and wrote couple of simple graphQL queries.

SDE Intern - Frontend

FloBiz — *March 2022 – August 2022*

- Used Angular to build features, such as, uploading image, blocking users and settlements, uploading greetings and business cards on the admin panel of myBillBook.
- Had a major contribution in the building of online store for the customers of myBillBook. An example of how the online store looks like.
- Built up online store's authentication, search functionality, popups, checkout tabs, etc. and made it mobile responsive.

Frontend Developer Intern

Subcircle — *April 2021 – March 2022*

- Built a responsive and customizable portfolio, generated dynamically using information provided by the user.
- Utilized VueJS to build components responsible for setting up and creating a Club to organize meetups and workshops.
- Developed functionality for creating Project and Project Plan where users can create a project and distribute the project into different parts using Project Plan.
- Built the Frontend for Go Play, whose main features include Color Picker (picking color from an image) and a Quiz for cosmetic enthusiasts to help them identify what shade suits them the best.
- Developed the Frontend for Talk Israel. A news company specifically focused on events happening in Israel.
- Translated UI/UX wireframes to pixel-perfect, mobile responsive user interfaces and successfully shipped two client projects.
- Had a major contribution in developing Upswells and Subcircle.

PROJECTS

Gravity | *ReactJS, Redux, ExpressJS, MongoDB, Mongoose, TailwindCSS*

Frontend || Backend || Live Preview

- Developed a full stack application imitating the popular social media app - Reddit.
- Used Express as backend framework to develop authentication and CRUD functionality for the app.
- Implemented Frontend using React, Redux and tailwindcss while adhering to best development practices.
- Currently working on building version 2 of this project using Next.js, TailwindCSS, Prisma, Nodejs, GraphQL and PostgreSQL. Switch to branch v2 in either frontend or backend repository to checkout the progress.

LANGUAGES AND TECHNOLOGIES

- JavaScript, Typescript, Python; React, Redux, Vue, Angular, Node, Express, Jest; MongoDB, PostgreSQL, Sequelize, Prisma, Mongoose, GraphQL; Git
